It's worthy of as the money. Thanks a lot. Background is the easiest way to change something. You must agree that if you change the background in the room, its appearance will immediately be not to mention the smartphones. If you haven't changed the desktop clean of your phone for a long time, this change could change create the feeling that you hold a brand new device in your hands. Furthermore, if you want to change the background regularly, you can watch something new and interesting on your screen every day. The App Store and Google Play have a huge selection of specialty applications, for example, 17 Best Screensaver apps for Android & iOS. They let you change themes, change the background, add new colors to your screen, and more. But not all of them will regularly change the image for you. We decided to find which of the services offer users regular photo updates and beautiful photos. So, we offer you 11 best automated background changing apps for Android and iOS. If you like live backgrounds - that is, those representing a GIF image or the constant movement of objects on the screen, 4K Wallpapers offer you a huge variety of them. All backgrounds in the application are of high quality and suitable for screens of different sizes. Even if you want to install it on your tablet, the quality will still be excellent. 4K Backgrounds don't consume too much of your battery, so you barely see the work of the service. All images are selectable with a single click, so you don't have to download them or search the gallery. 4K Wallpapers has collected separate albums with themed backgrounds, under which you'll look for something you like - it can be an abstraction, food, music, nature, and more. You can also like: 15 Free Backdrop and Background Maker Apps (Android & iOS) back to menu ^ iPhone owners know firsthand that it's not always possible to improve or customize your smartphone. Now you can do this with the functionality of Wallpapers & Themes for Me, which allows you to decorate your screen. All the changes you'll be offered can be previewed and tested to see if you really like this kind of screen. To make sure that you can smile every time you unlock your smartphone, you can use both the standard and advanced features. As usual, there are a limited number of different backgrounds for your screen, as well as very few different topics. After purchasing a Subscription Backgrounds & Themes for Me gives you access to all premium backgrounds and themes, as well as regularly add new copies to the catalog. Back to menu ^ This application has very simple functionality, which you can immediately understand from its name. The Auto Change Wallpaper automatically changes the background on your smartphone screen, without your engagement and in just a few seconds. Changes can be set in the settings themselves - this can be a certain amount of time, closing the screen or double-clicking the screen. It should be on that all images for background Auto Change wallpaper upload from your gallery. You will be able to create a separate folder to which you need to download the pictures, pictures, and photos you want to see on your screen. The can also select a random image of all the hosted: the main thing is to specify it in the settings. Specify. A conclusion about the Auto Change Wallpaper, we can say that it is very simple and clear for the regular user. back to menu ^ Don't you know what you want to install as a background on your smartphone? Then leave it to the Casuals application. There are over 3 thousand images in its catalog with different themes and in high resolution, and you can also add something new yourself. If you like, you can fully organize the change of background from the gallery of your smartphone, choosing just the best of them. Casuals has additional features and capabilities that are available in the public domain and for purchase. In the application, you determine the frequency or signal at which the background of your smartphone will change. This can be a random installation every time you unlock your smartphone; when the phone shakes (just shake it); a certain amount of time - it can be several hours or days. Casuals helps users seamlessly personalize their smartphone. back to menu ^ High-quality backgrounds in both 4K and HD resolutions are available in almost all specialized applications. With Everpix, you get it completely free and in large quantities – a few thousand quality images of your choice. Everyone is categorized to make your choice much easier. You can choose new themes every day if you're not too lazy to do it so often. Everpix is a widget that can also be installed on Apple Watch. So you can have different backgrounds not only on your smartphone, but also on the smartwatch. A large number of backgrounds and features are free, but there's also a subscription option. Members of the Everpix Premium Community receive regular updates and premium features, as well as full elimination of ads. While you can choose from a large image library even without buying a subscription, it's a significant advantage to get rid of ad. You might also like: 15 Free Lock Screen Apps for Android & iOS (widgets & wallpaper) back to menu ^ Optimization for battery performance is the main advantage of Wallpaper Changer. If you really care about your smartphone's uptime, as well as the power consumption of each of the applications, the best choice is the most optimized option. The Wallpaper Changer is fully optimized – it works quickly, but your smartphone battery won't run out of power. Background Change with this application can be either automatic or manual. You can constantly switch background to the next one by simply clicking on the Wallpaper Changer widget. There is also a timer available, which will be used to switch the image. It may take some time for you to set up all the settings of the application in full, but in the future you will only look at the process of its operation. back to menu ^ If you need to change not only your background, but also update your screen information regularly, the Changer app is a good choice. The app lets you change according to your location, time of year, current weather and other factors – on what you want. It may also be other images that the user chooses. To change Changer the background of your smartphone, you need to determine what you'll see each time. This can be a random standard background or your images from a directory. Changer can connect to cloud storage or smartphone memory by randomly selecting an image. In the application settings, you can absolutely define all the nuances – frequency of changes, source, and access to data. back to menu ^ Developers immediately decided on which platform their application would run. Backgrounds HD for iPhone has a large and varied catalog of backgrounds for your smartphone, which can be customized to fit any model of iPhone. The application is optimized not only for the latest models of Apple phones, but also for iPod and iPad, which allow you to use the same images on all your devices. Because the display size can vary, Backgrounds HD for iPhone automatically adjusts the background to the full screen without trimming or twisting the image. All backgrounds and backgrounds are available once the service is installed on your smartphone. For easy setup or your special wishes, Wallpapers HD for iPhone also has a small photo editor, which makes it possible to apply effects or color correction. Back to menu ^ The SB Wallpaper Changer is a simple application that will require action before it will work. You'll need to install it, and then choose which triggers the background you prefer will change. This can be an automatic time change, screen orientation change, when your smartphone is locked down, and other options. We recommend that you see exactly what your images will look like in advance on your desktop – you may have issues sized and trimming your photos. It should be noted that the SB Wallpaper Changer differs from similar applications in that it automatically changes the appearance of the screen saver when the orientation changes. In other words, the application handles both vertical and horizontal work modes. When you change the background, you can also include effects you'll see - eclipse, swipe, and others. There is also a set of default backgrounds - they are very simple and standard, such as landscapes and nature. Back to menu ^ If you're a smartphone with a non-standard screen resolution, Tapet is a great option for you. Here, the wallpaper is automatically created according to the screen size, which allows you to use images in a high-quality images in any situation. The service does not contain downloaded images from the Internet – everything is immediately created on your smartphone. Here you can create backgrounds in non-standard styles – for example, Material Design. On each image, you can impose additional effects, such as parallax (sounds already unusual, though) or standard blurred. It's worth noting that Tapet doesn't use live background technology, so it practically doesn't charge your battery. Of course, like everyone Services, this application supports different options for changing the background - hourly, at certain intervals, or due to some trigger. You might also like: 11 Best poster maker apps for Android & iOS back to menu ^ Unsplash is another great application that lets you change the background regularly on your smartphone. If, in other services, you only had access to standard inventory images, you'll get endless material from many photographers here. The fact is that Unsplash hosts nearly 2 million high-resolution photos, which were taken by real people and uploaded to the service. In addition to being able to change your smartphone's background, all images you think are beautiful and interesting can use in your projects. Presentations, videos or even just photos for social networking posts – everything will be much better with high-quality photos. Unsplash allows you to take your own photos and upload your own photos to the application directory so that other users can take advantage of your creation as well. You can have a standard manufacturer's image on your screen since you bought your smartphone – some abstraction, nature or something else, unisghty and inconspicible. You can put another image on your home screen or lock screen yourself – but even that image will get boring over time and you have to look again for something new. Therefore, it's automatic to change the background on your smartphone, ideal for people who don't like looking at the same objects for a long time. You can choose from our selection of the most suitable app for you and install it on your smartphone now. Then, within a few minutes, your screen will be flashed with new colors. Colours.
